Laboratory work 8

VIEW.

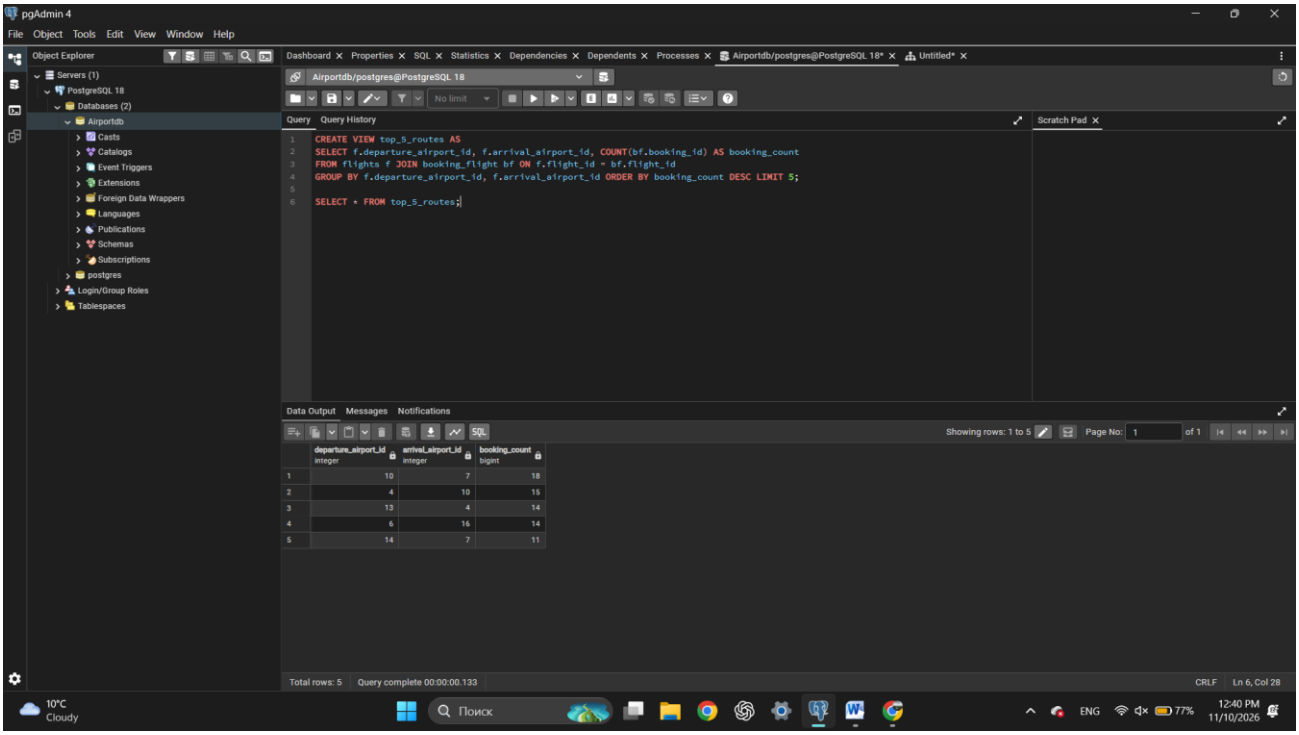

1. Create a view to show details of all flights that are departing on a specific date.

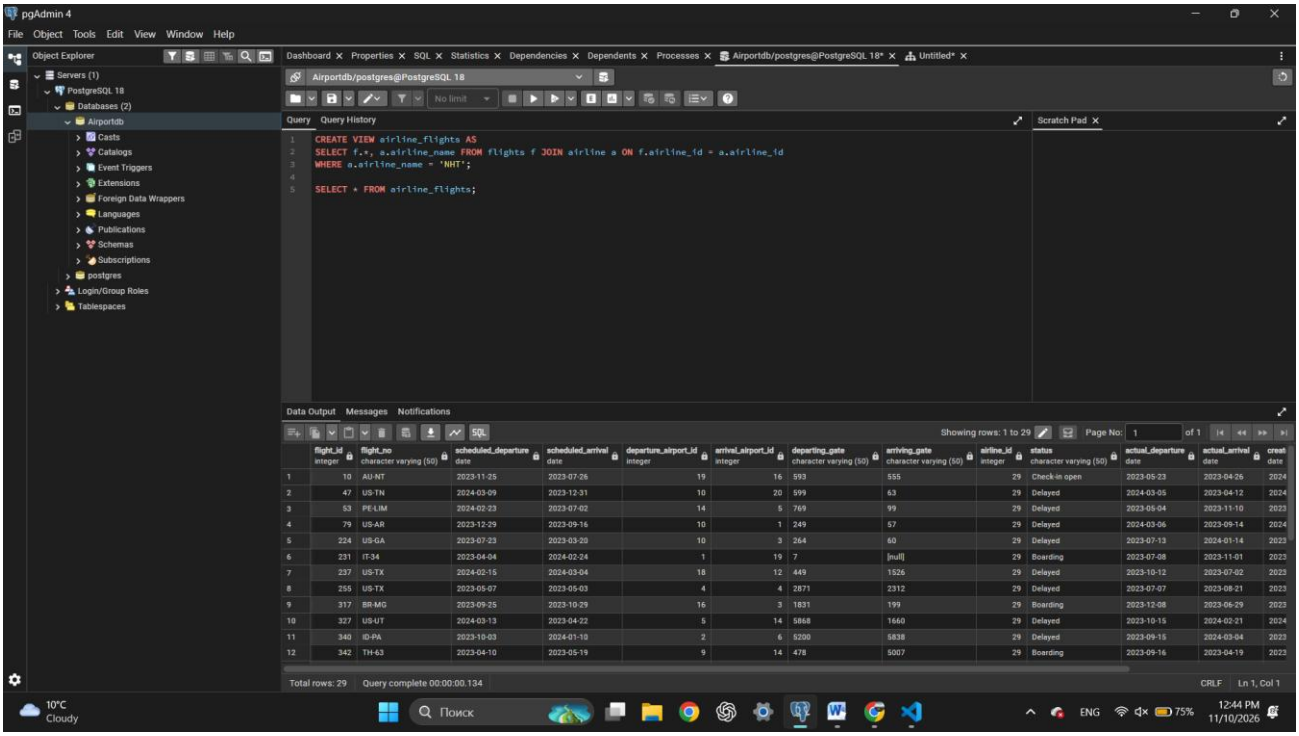

2. Create a view that shows bookings for flights scheduled to depart within the next week.

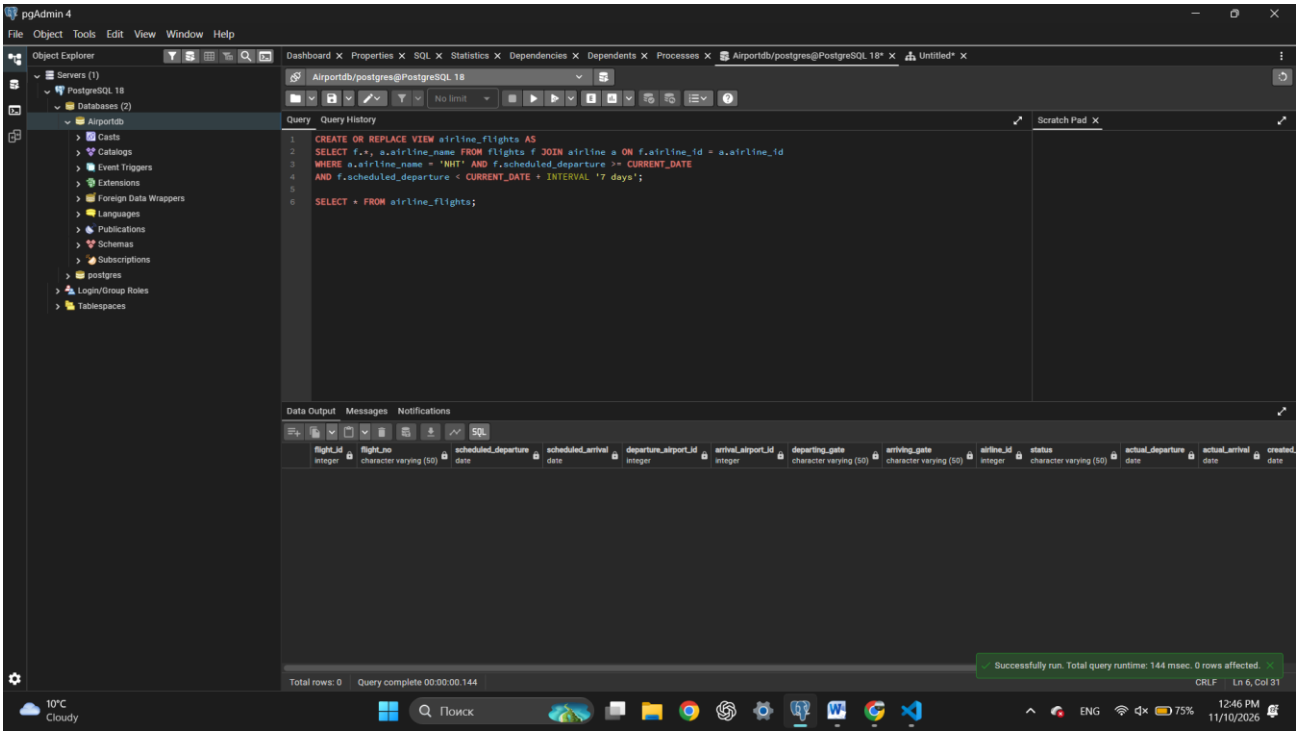

3. Create a view to show the top 5 most popular flight routes based on the number of bookings.

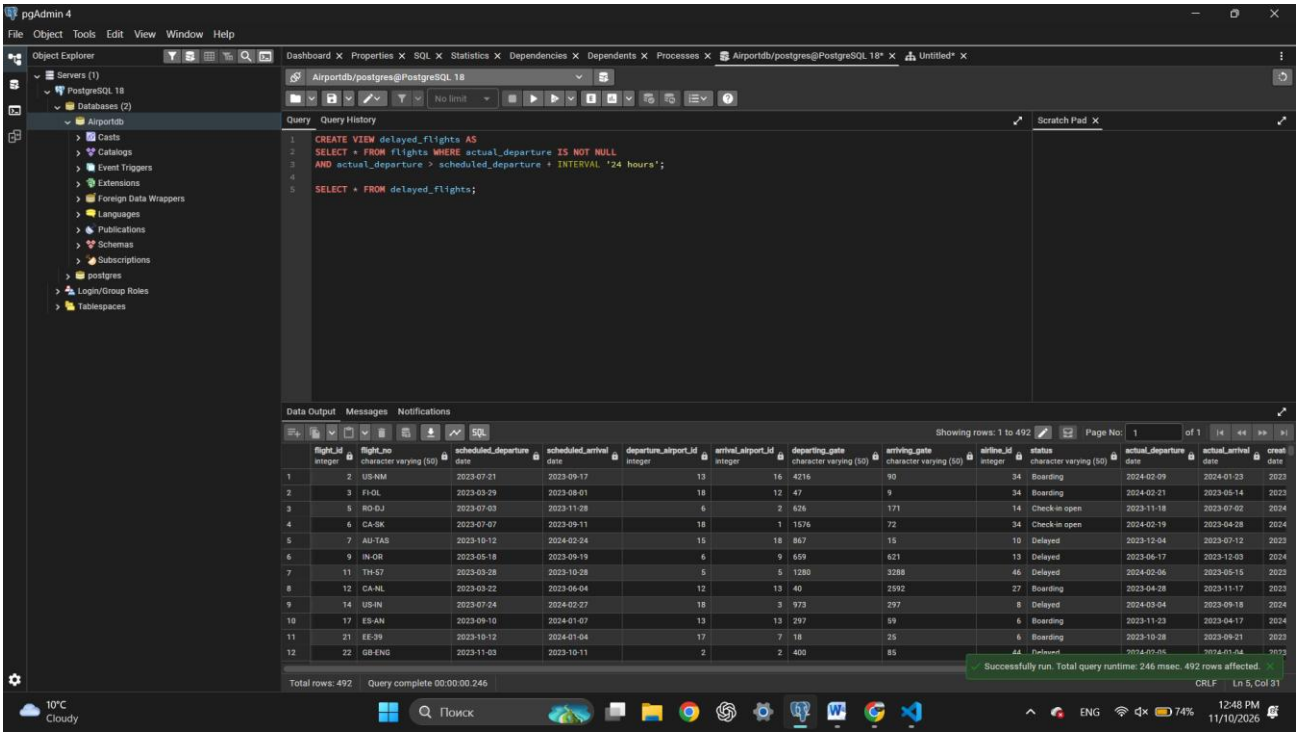

4. Create a view that lists all flights for a specific airline.

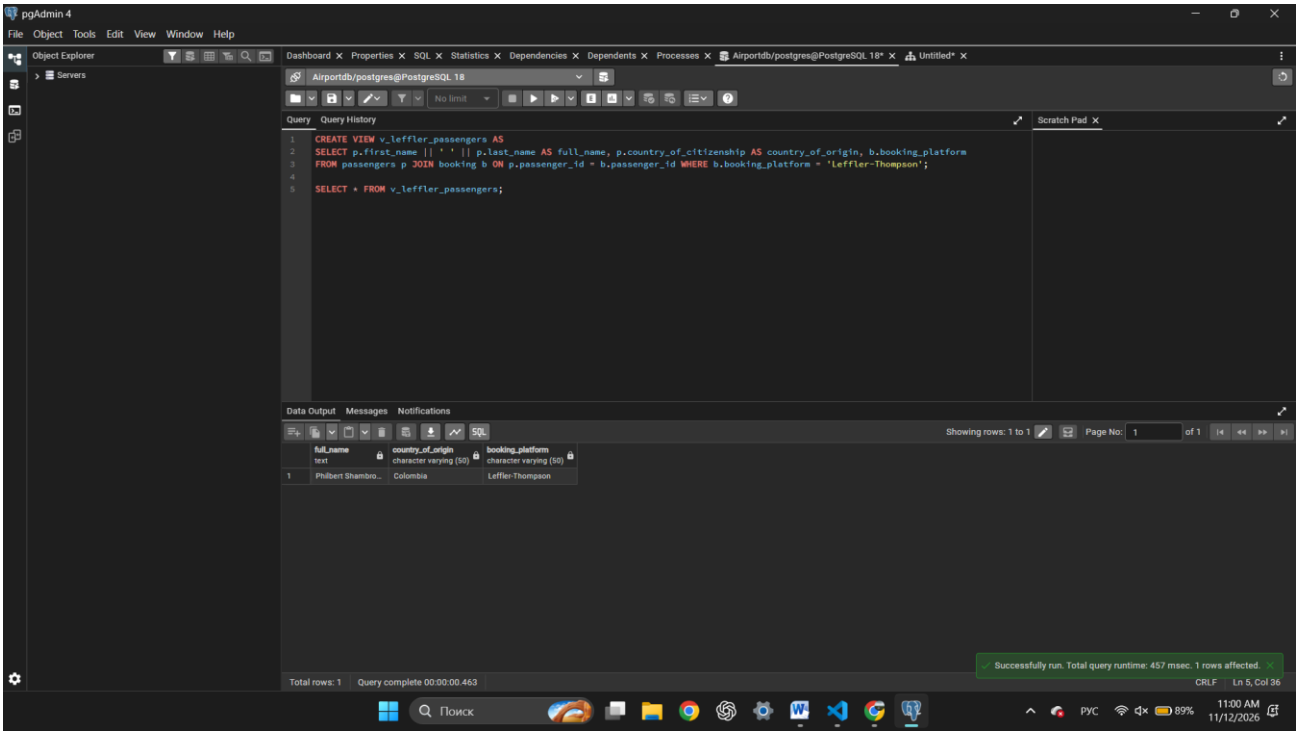

5. Modify the view created in task 4 to show only flights departing within the next 7 days for a specific airline.

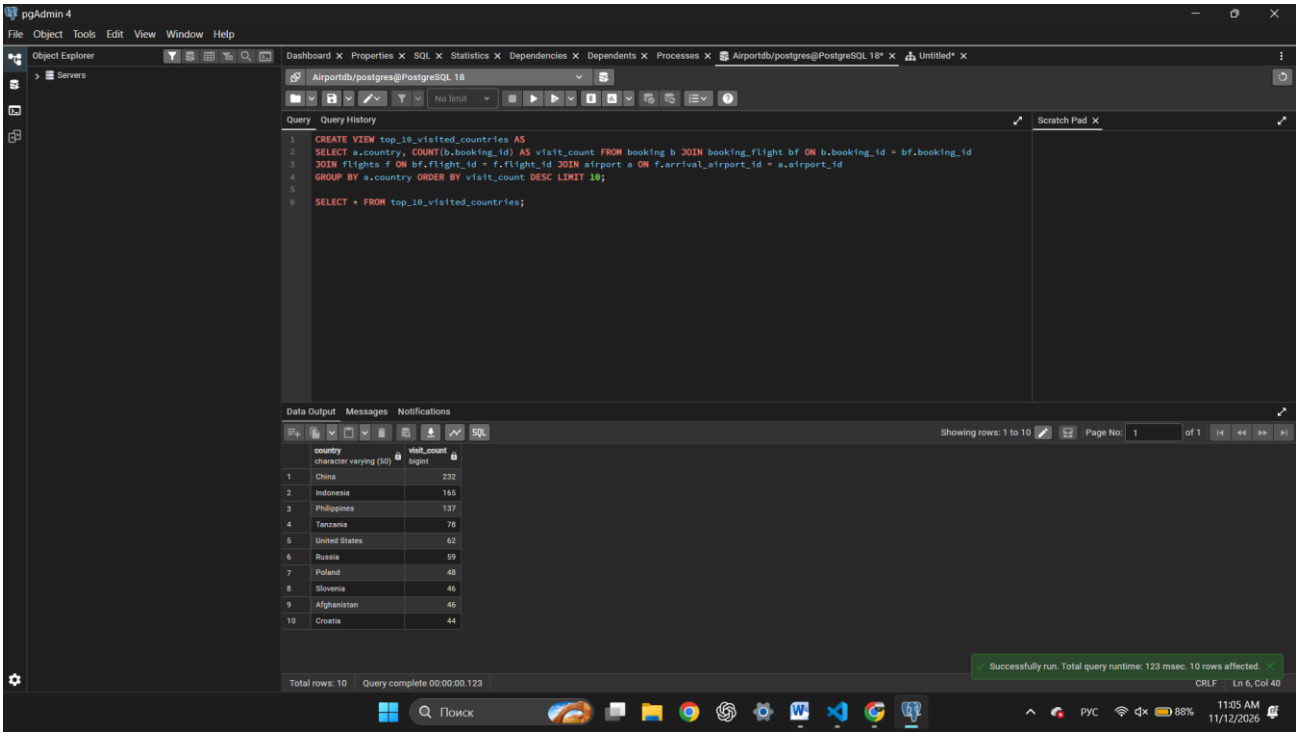

6. Create a view to show flights that are delayed by more than 24 hours.

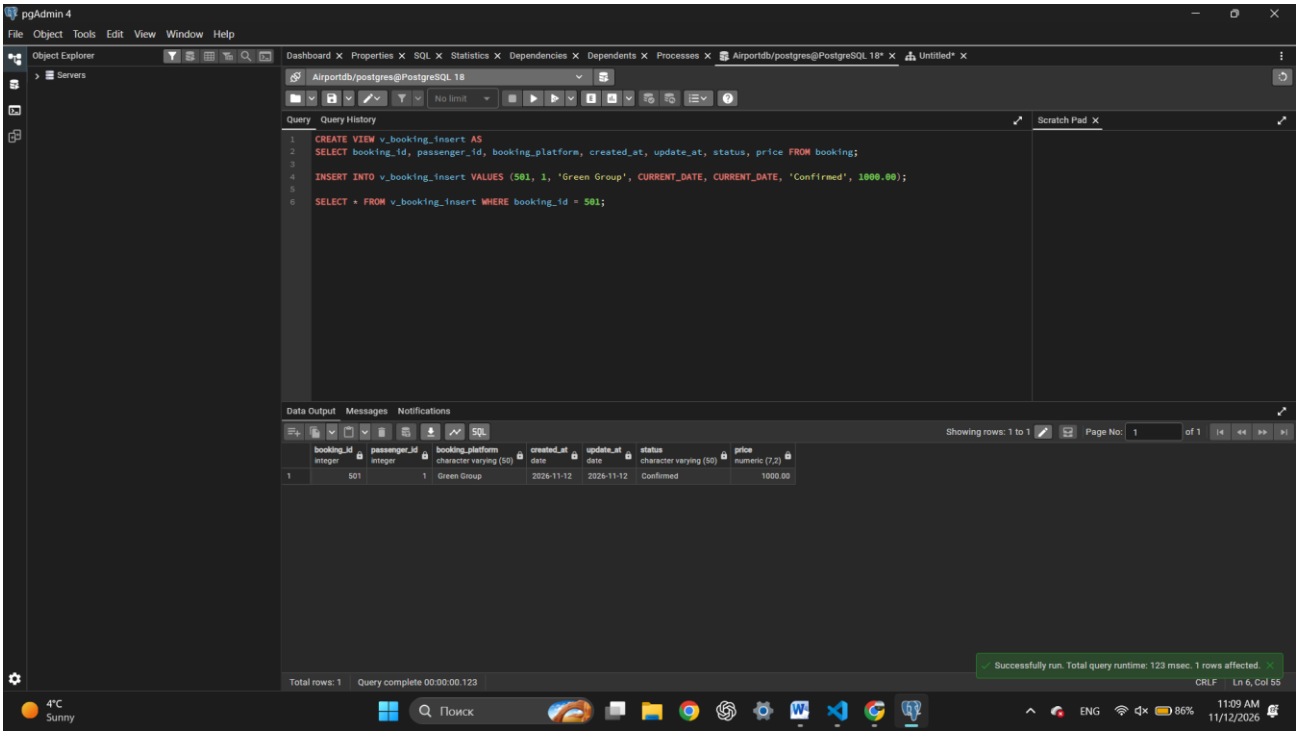

7. Create a view in which you can display the full name and country of origin of passengers who made bookings on Leffler-Thompson platform. Then show the list of those passengers.

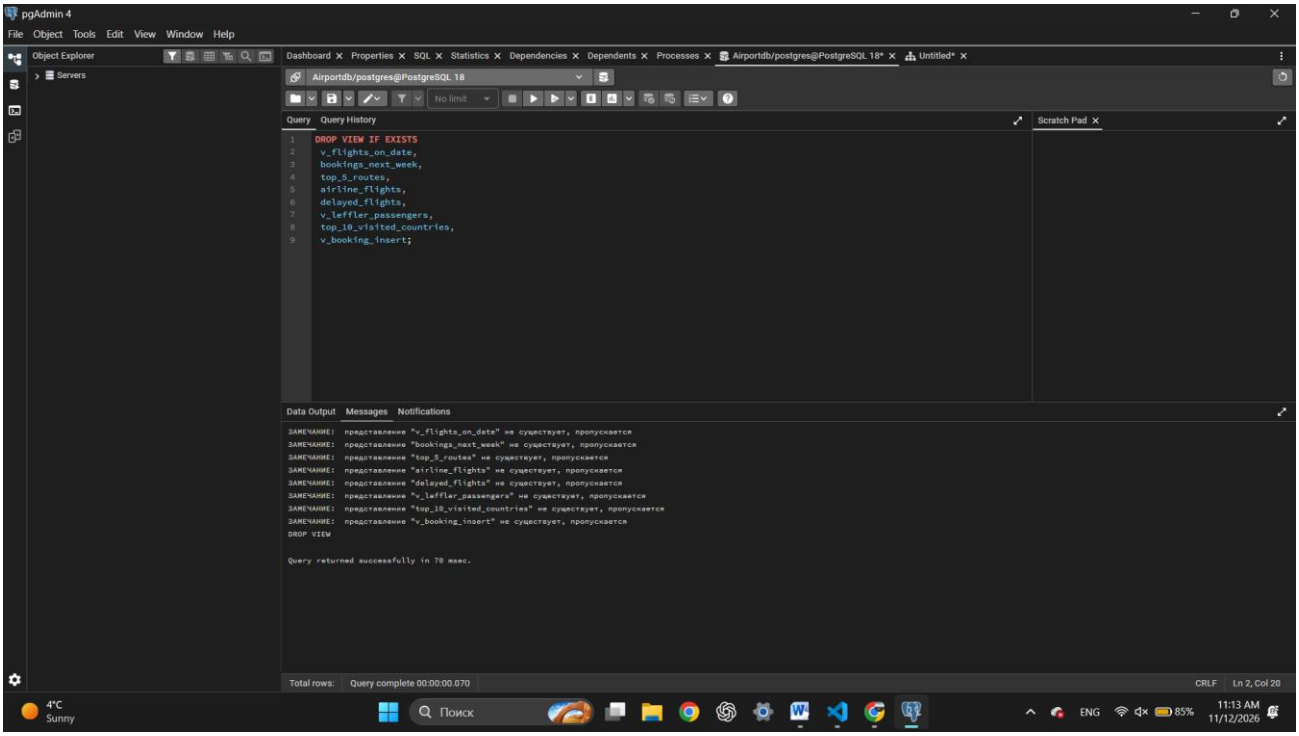

8. Create a view that shows top 10 most visited countries.

9. Update any of the created views by adding new information in the view table. Show results.

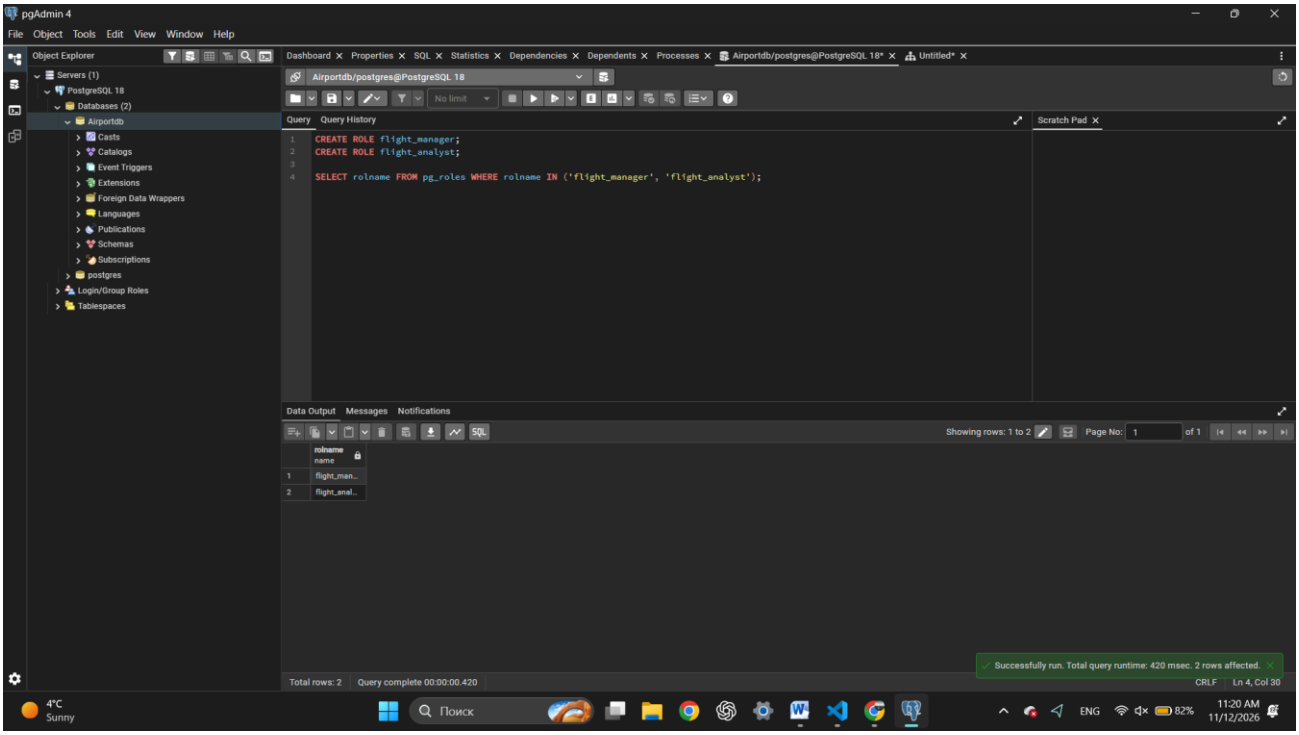

10.Drop all existing views.

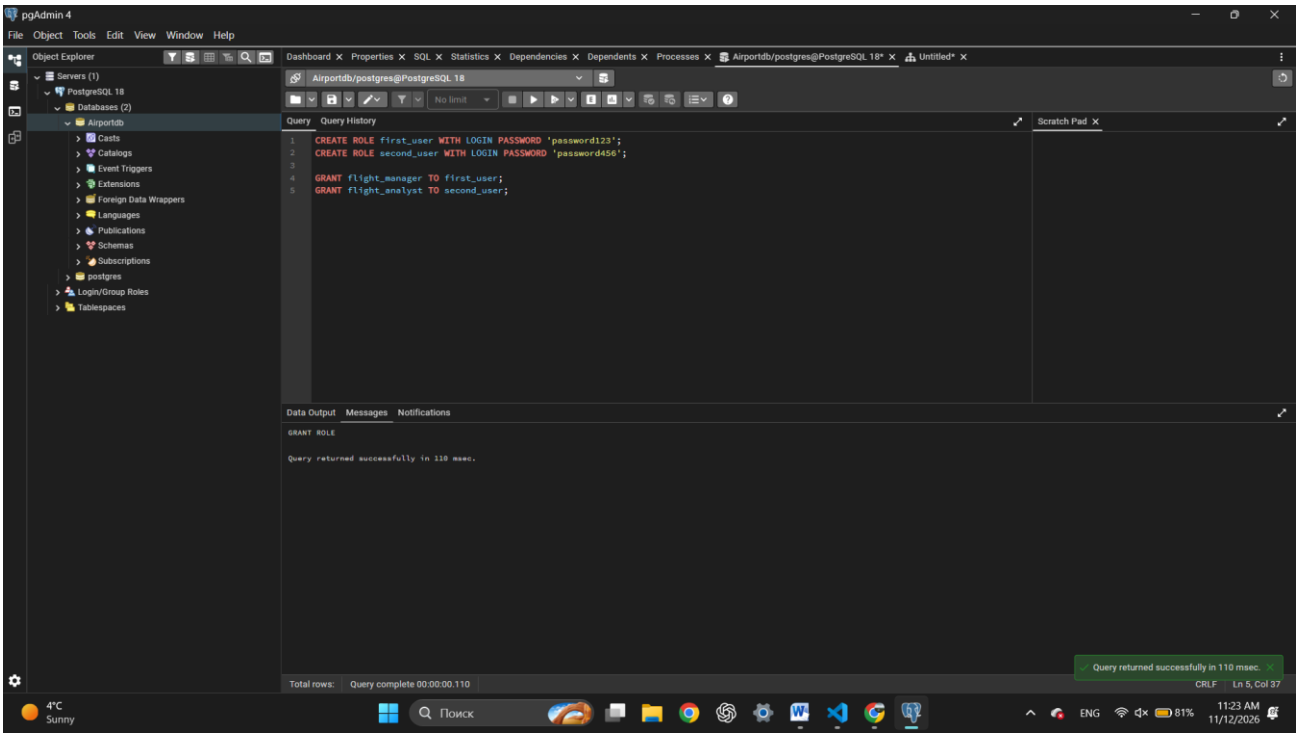

ROLES.

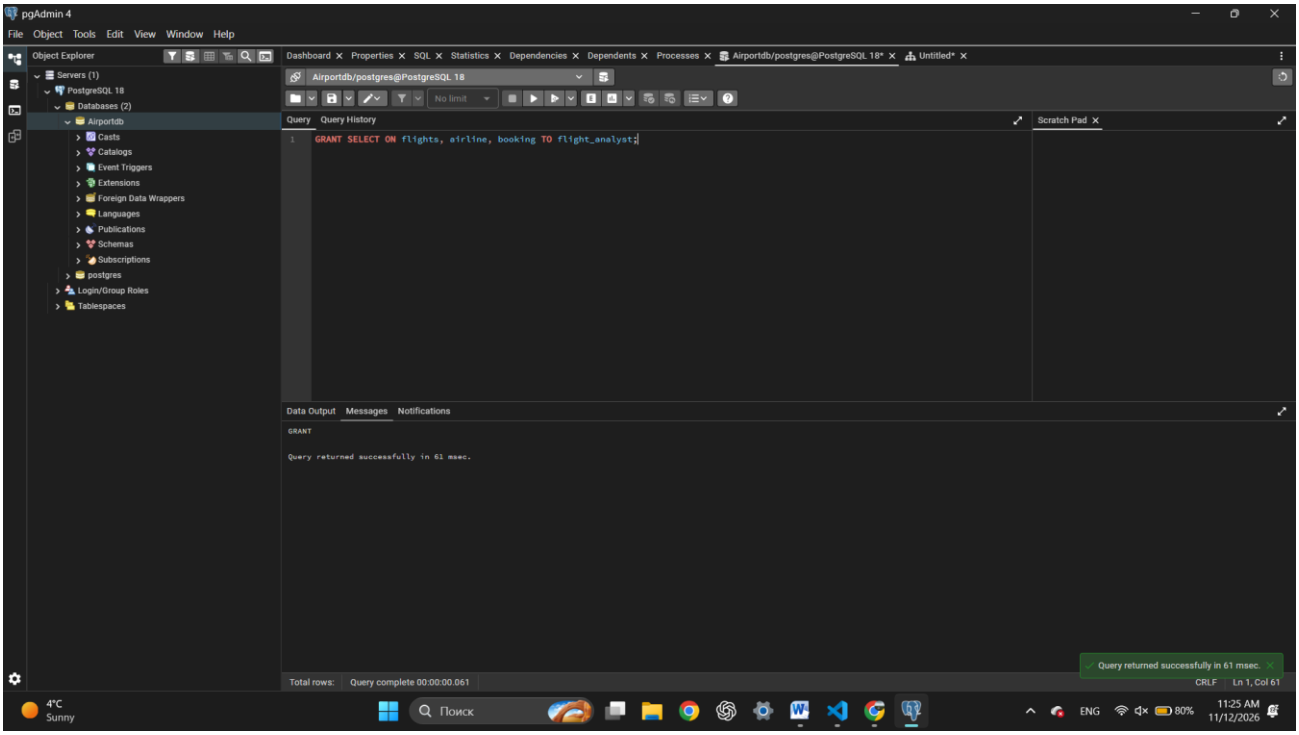

11.Create the group roles flight_manager and flight_analyst, then show the list of roles.

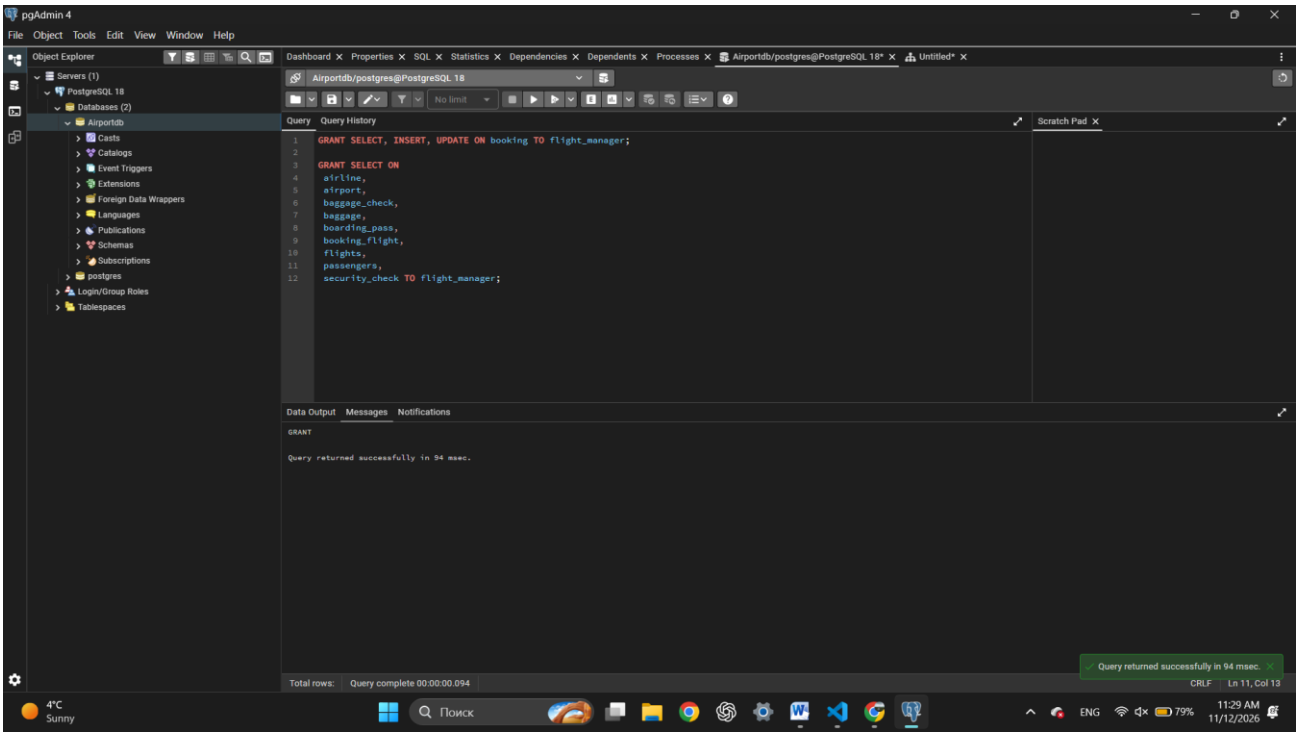

12.Create the users first_user and second_user and add them to the group roles.

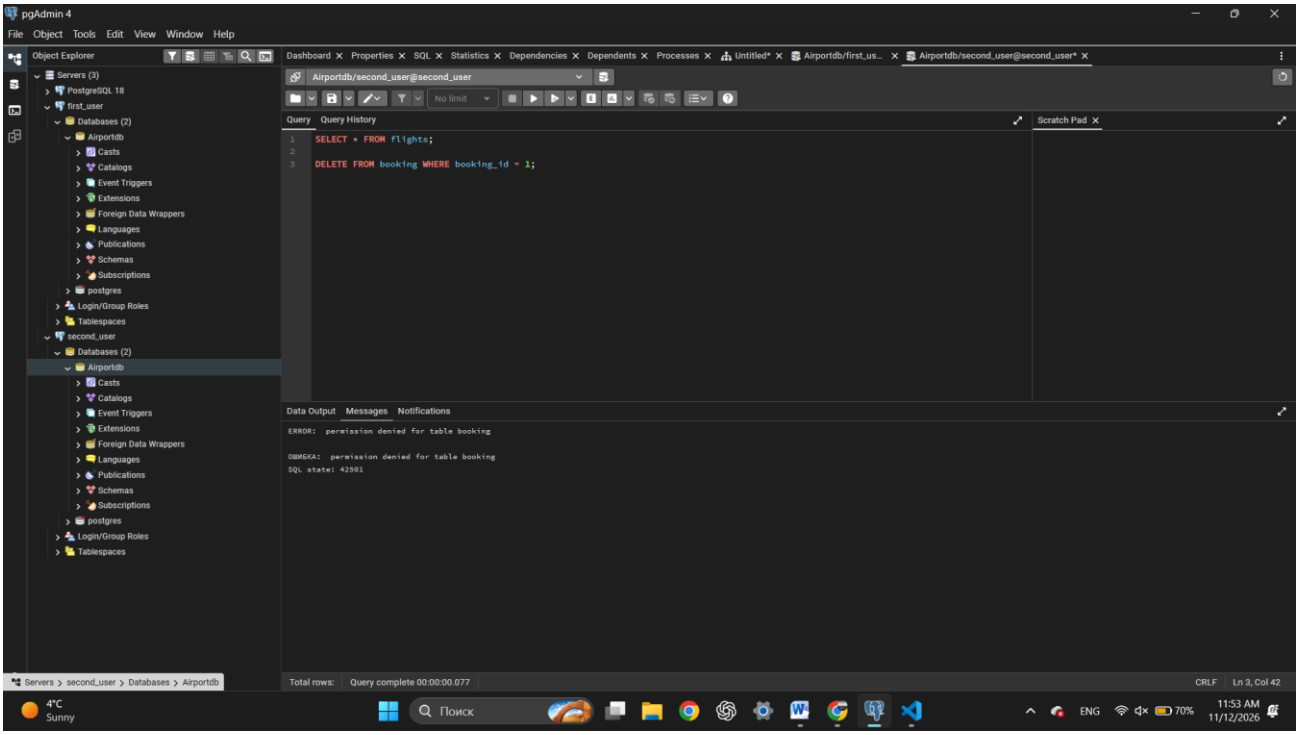

13.Grant flight_analyst SELECT on the flights, airlines and bookings tables.

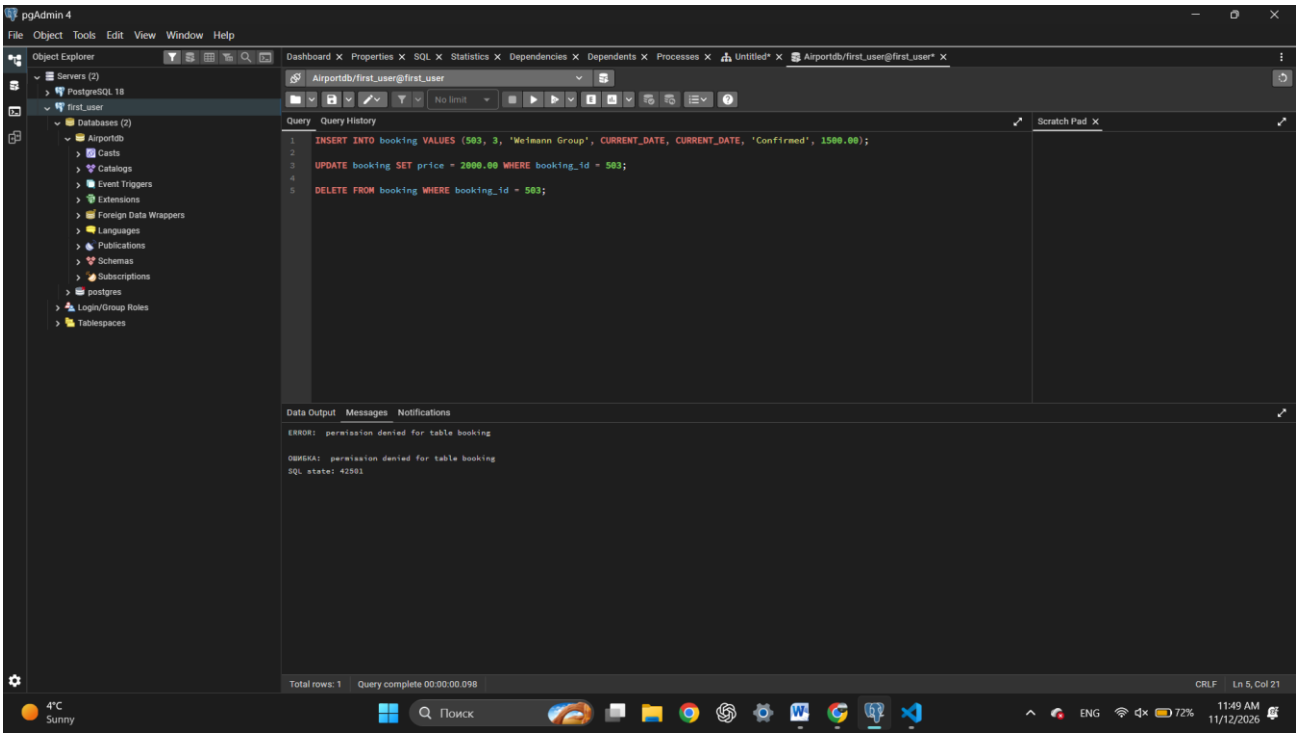

14. Grant flight_manager SELECT, INSERT and UPDATE on bookings, and SELECT on the other tables.

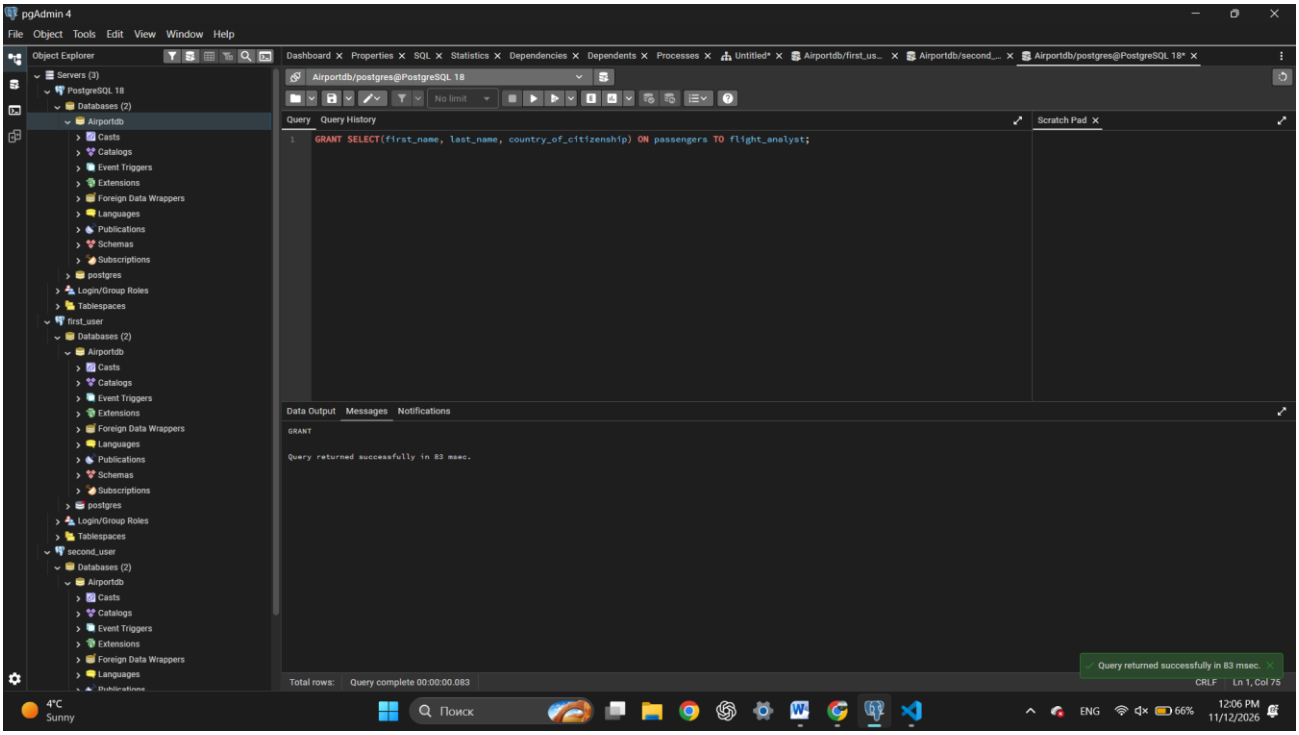

15. Connect as second_user, read flights and try to delete from bookings.

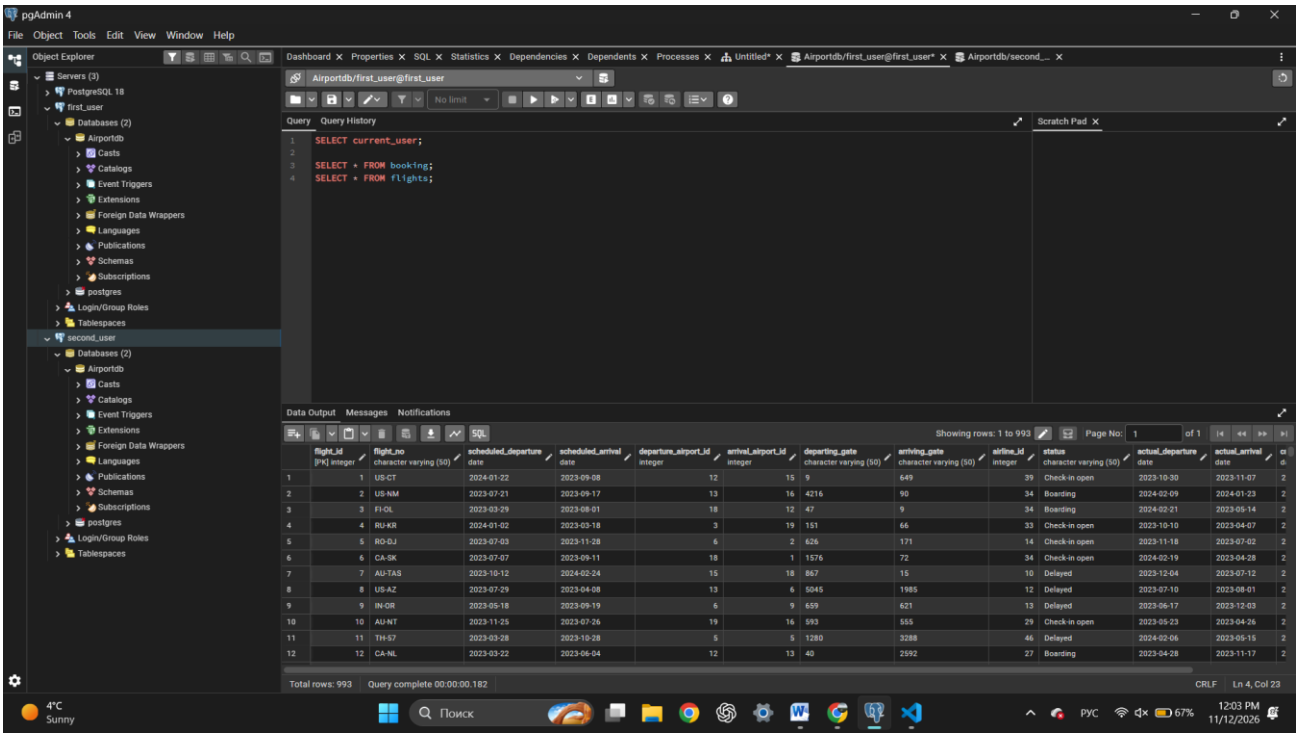

16. Connect as first_user, insert and update a booking, and try to delete one.

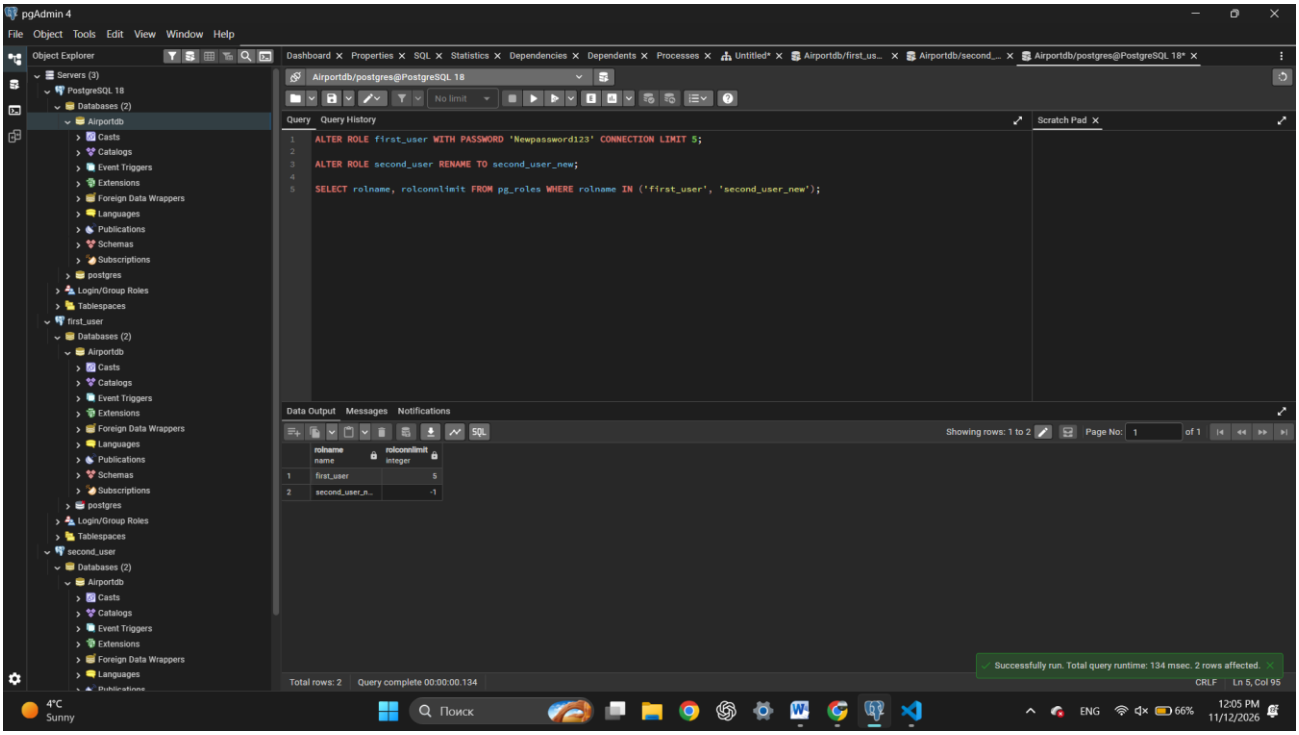

17. Grant column-level SELECT on only the full name and country columns of passengers.

18.Revoke SELECT on bookings from flight_analyst and show that access is denied.

19.Alter the roles: change a password, set a connection limit and rename a role.

20.Drop all created roles.
